FROM MODELS TO EXECUTION

Your organization has spent the time and energy producing models of your business processes, now it's time to optimize these processes. Taking your model and executing via policy alone isn't good enough anymore in today's enterprise. Management needs a tool to help enforce those policies, manage business rules, monitor activity, and document audit trails. Your organization doesn't need an army of analysts anymore, Business Process Management Systems can help you achieve these goals. Whether you are seeking productivity gains, under regulatory and compliance pressure, or need to do more with less, we can help.

WHAT ABOUT WORKFLOW?

Business Processes depend on workflow whether it involves humans or systems. Workflow Management is a component of BPMS that provides the automation of a business process, in whole or part, during which documents, information or workflows are passed from one participant to another for action, according to a set of procedural rules. SRA's experts can help your organization come to grips with complex workflows and achieve significant ROI through automation, exception handling, and business logic. Workflows reveal the actual lifecycle of business events, and help to integrate components of the value chain.

KEY BENEFITS

- *Integrate Capabilities for Higher ROI - Using tactical Segment Architecture projects, complex business services problems may be simplified and solved with manageable engagements leveraging BPMS tools.*
- *Rapid Development, Implementation, and Results - Business requirements are identified modeled, workflows are designed; BPMS tools are configured; automated processes are deployed; and users are trained within weeks versus months.*
- *Simulate Change and Transformation - BPMS tools quickly develop and deploy new rules, roles, measurement and metrics to optimize performance and ensure total end-user satisfaction with the piloted changes.*
- *Incremental and Real-Time Modifications - Operationalize local business unit process improvement projects with managed roll-out without minimizing the enterprise value of BPMS services.*
- *Extend Legacy Value - BPMS enterprise integration applications orchestrate and leverage components of existing technologies to overcome tight coupling barriers and build visibility.*
- *Smart Modernization - BPMS closes immediate gaps between legacy systems allowing agencies to integrate and align Enterprise Architecture and Transition Planning for sustainable modernization programs and governance.*

BUSINESS PROCESS MANAGEMENT SERVICES FROM SRA INTERNATIONAL

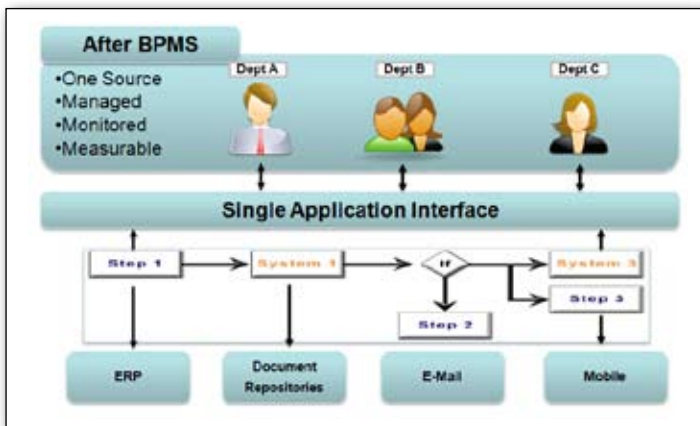

Trained consultants with years of experience; let us be your trusted partner in moving towards the agile enterprise. SRA can help your organization with all aspects of Business Process Management: Design, Execution, Integration, Training, Analytics, and Support. SRA's proven methodologies for Business Process Reengineering, Project Management, COTS Evaluation, and Business Modeling can be applied to your projects in order to guarantee success.

DYNAMIC TASKING

SRA International delivers Executive Tasker, a proven solution for streamlining correspondence and action tracking. As data calls and requests pour in, management can dynamically create or delegate work items while viewing task status in an intuitive, actionable format. What was once a series of disjointed peer-to-peer e-mails is now a single, centralized, pictorial view, clearly illustrating the journey of a task from creation to assignment to sub-delegation and completion, including all individuals involved, comments and collaboration, attachments and status information. SRA's innovative mobile solution for BlackBerry® devices help organizations manage tasks in the office or on the go.
